

multi-heads induction coil for heating copper wire heads

United Induction Heating Machine Limited

We are experienced in Induction Heating, induction heating machine, Induction Heating equipment. They are widely used in induction heating service, induction heat treatment, induction brazing, induction hardening, induction welding, induction forging, induction quenching, induction soldering induction melting and induction surface treatment applications
<http://www.uihm.com>

Advantage: heating speed is quick.

Disadvantage: need different induction coils for different motors as each motor / stator may have different wire heads for soldering, complex for changing induction coils.

Equipment: UM-20AB-UHF
